

COVID 19 DATA ANALYSIS PROJECT USING PYTHON

Proposal
2021

1- BACKGROUND :

Covid-19 started in Dec 2019 and was first reported from Wuhan, China. It is defined as an illness caused by a novel coronavirus called severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). On March 11, 2020, the WHO declared Covid-19 a global health emergency

2-Problem:

The outbreak of the Corona epidemic or Covid-19 was not the only dangerous virus that spread around the world, as it was also accompanied by a massive and rapid spread of rumors, false information and false news about it, and this fake news is considered part of a larger epidemic that causes confusion and fear and therefore we will explain in this project Confirmed cases of corona.

3-Requirements :

Q1. Show the number of confirmed , deaths and recovered cases in each region ?

Q2 . In which Region maximun number of confirmed cases were recorded ?

Q3. In which Region minimum number of Deaths were recorded ?

Q4. How many confirmed , death and were reported for Saudi Arabia?

Q5.How many country are the death?

Q6.How many country are the confirmed?
